

StepArray column loudspeaker SA100P

StepArray

SA100P - Datasheet
Digitally steerable column loudspeaker

StepArray column loudspeakers ensure perfect speech intelligibility and optimal acoustic comfort, even in noisy and reverberant venues. They are based on the DGRC principle (Digital and Geometric Radiation Control).

SA100P are often used in pairs, in stereo mode. They can be installed in conference halls, lecture theatres, court houses, etc.

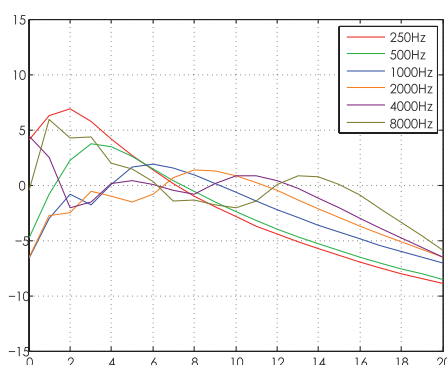

DSP processing of StepArray columns is performed in the NUT processor.

The NUT control software can be downloaded for free.
